Career Objective

Seeking a challenging position as a Senior Software Developer. I want to make use of my interpersonal skills to achieve the goals of a company that focuses on customer satisfaction and customer experience. I have strong confidence in working with a team and independently. Currently working as a Lead Web Backend Developer at Better HR Company in Myanmar.

Work Experience

Lead Web Backend Developer   **Jan 2022 - Present**

BetterHR Co., Ltd, Yangon, Myanmar

As the Lead Web Backend Developer at Better HR, I spearheaded the development and maintenance of various crucial features within the company's web platform and I developed Mobile APIs for mobile application. My responsibilities included:

1. **Multi-Country Payroll Feature**: I designed and implemented a robust multi-country payroll feature, enhancing our platform's capabilities to efficiently handle payroll processing across different regions

2. **Project-Based Payment Feature**: I developed a specialized payment feature tailored for project-based compensation, providing clients with a flexible and customized payment solution.

3. **Skill CRM Feature**: I introduced a Skill Customer Relationship Management (CRM) feature, empowering our clients to manage and leverage their workforce's skills effectively.

4. **Employee Resource Center Feature**: I played a pivotal role in creating an Employee Resource Center, a valuable resource hub for employees, fostering engagement and productivity.

5. **Chat Feature Integration (Using GetStream)**: I seamlessly integrated a real-time chat feature into our platform using GetStream, facilitating instant communication and collaboration among users.

6. **Overtime Analytics Page**: I established an Overtime Analytics Page to provide clients with in-depth insights into overtime trends, aiding in workforce management and compliance.

7. **Employee Movement Feature**: I developed an Employee Movement Feature to track and manage employee transitions within organizations, streamlining HR processes.

8. **Logging with CloudWatch**: I implemented CloudWatch for production debugging, ensuring robust monitoring and efficient issue resolution to maintain platform reliability.

9. **API Development for Mobile**: I took charge of building an API for mobile applications, extending platform accessibility and enabling mobile users to seamlessly interact with our services.

10. **Performance Optimization (Inbox Page and Payroll)**: I led efforts to optimize the performance of critical components, significantly reducing load times and enhancing the overall user experience for both clients and internal users.

Laravel (PHP Framewokr)

GraphQL

Vue.js

Nuxt.js

Node.js

Docker

Full Stack Web Developer   **Jul 2020 - Dec 2021**

Bagan Innovation Technology Co., Ltd, Yangon, Myanmar

As a Full Stack Web Developer at Bagan Innovation Technology, I developed and maintained a Messenger chatbot to improve customer experience and streamline the pre-order process for the online shop page. The chatbot allowed customers to easily interact with the online shop and submit pre-order forms through Facebook Messenger. Additionally, I was responsible for developing an admin dashboard for Tharapa, which allowed the company's administrators to manage and track orders, stocks, and other data in real-time.

Junior Full Stack Web Developer   **Jan 2019 - Apr 2020**

ITVISIONHUB Co., Ltd, Yangon, Myanmar

As a Junior Full Stack Web Developer, I have developed Property Star for all users and ListingDB websites for property agents. And I have also developed the ITVISIONHUB website for the company using Vue.js frontend and Node.js for backend API. As a result, I have gained experience in building full-stack web applications.

Furthermore, I have also worked as a Node.js instructor, providing training and guidance to students in developing real-world web applications using Node.js, Express.js, and other related technologies. This role has allowed me to share my knowledge and expertise with others while keeping up-to-date with the latest web development trends and best practices.

Internship Program   **May 2018 - Jul 2018**

Cyber Wings Technologies Co., Ltd, Yangon, Myanmar

During my web developer internship program, I gained valuable experience in designing and developing web applications using HTML, CSS, PHP, and JavaScript. I worked closely with senior developers to learn new web technologies and frameworks such as Laravel (PHP Framework) and Vue.js. I also gained experience in troubleshooting and debugging web applications and collaborated with cross-functional teams to develop, test, and deploy software solutions.

In addition to technical skills, I developed strong communication and teamwork skills, as I collaborated with other developers, designers, and project managers to deliver projects on time. Overall, my web developer internship program provided me with a valuable learning experience and helped me to develop my skills in web development and software engineering.

Project Summery

BetterHR

BetterHR Co., Ltd
